MAXIMUS l'aspirazione di materiali particolari quali i trucioli di metallo, residui di legno e vetro, nonché oli, lubrificanti e quant'altro derivante dagli scarti della produzione meccanica. Il filtro di aspirazione ad elevata superficie filtrante, è protetto dall'urto diretto dei materiali per mezzo di una barriera che favorisce l'effetto ciclone.

MAXIMUS allows a comfortable suction of metal swarfs, wood tailings, debris, pieces of glass, exhausted oil, lubricating oil and any other kind of waste deriving from mechanical manufacturing. The cartridge filter which has a high filtration capacity and efficiency, is protected by a metal cone against direct impact of all kinds of debris creating the so called cyclone effect.
